BRASSELER USA®

BY YOUR SIDE

BC SEALER SOLVENT™

Introducing BC Sealer Solvent, a specially formulated, novel root canal cleanser used during retreatment for the removal of bioceramic sealers and calcium hydroxide. With a blend of patent-pending acids, chelators and surfactants, BC Sealer Solvent effectively removes bioceramics from canal walls prior to final obturation while still remaining gentle on dentin.

BC Sealer Solvent 8 oz.

Order No.	5031698U0

Order online at **BrasselerUSA.com** or call **800.841.4522**.
In Canada call **800.363.3838**.

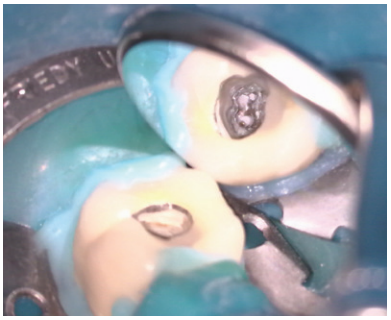

BC Sealer Solvent™

Clinical Case

"Unlike other solvents, BC Sealer Solvent is very easy to use and not messy. It has a great effect on removing bioceramic sealer stuck on the walls, and it becomes even more superior when combined with the XP Finisher."

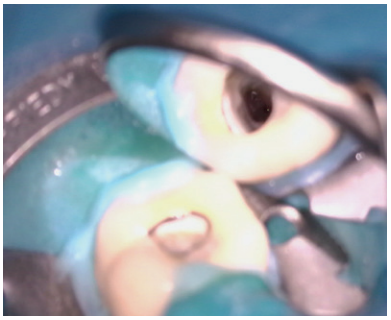

CHAFIC SAFI, DMD, MS
Faculty, Next Level Endodontics

XP-3D

The Biologic Standard of Care in Retreatment

- The XP-3D Shaper's serpentine shape allows the instrument to encircle gutta percha and pull it out of the canal in large pieces.

Image courtesy of Dr. Klaus Lauterbach - Germany

- The XP-3D Finisher, featuring a sickle shape, gently pulsates within the canal dislodging stubborn gutta percha tags and debris.
